

1. To get the data to create either the bottle or judging stickers, it should be exported from the website, using Data Exports > Entries and Associated Data. “Paid & Received Entries” seems to make the most sense for these but I don’t think it matters.

## Administration Dashboard

Hello, Judge. Click or tap the headings or icons below to view the options available in each category.

Participant Data (CSV)	<a href="#">All Participants</a> <a href="#">Winners</a>
Entries and Associated Data (CSV)	<a href="#">All Entries: All Data</a> <a href="#">All Entries: Limited Data</a> <a href="#">All Entries: Limited Data with Brewer Contact Info</a> <a href="#">Paid Entries</a> <a href="#">Paid &amp; Received Entries</a> <a href="#">Paid Entries Not Received</a>

2. When using the "QRLabeler" program, you can use the "-?" option to get help and see the following help text:

---

\* To generate judging labels:

```
QRLabeler.exe -j -d [CSV of entry data] -f [PDF output file name]
```

For example "Electronic\_Scoresheet..." is the website data export and the labels will put put in

"JudgingLabels.pdf" with the following command:

```
QRLabeler.exe -j -d
Electronic_Scoresheet_Practice_Sandbox_Entries_Paid_02-12-2022.csv -f
JudgingLabels.pdf
```

\*\* The "Electronic\_Scoresheet..." file is from the "Data Exports" section of the website, "Paid & Received Entries"

\* To create bottle labels:

```
QRLabeler.exe -b -d [CSV of entry data] -f [PDF output file name]
```

For example "Electronic\_Scoresheet..." is the website data export and the labels will put put in

"BottleLabels.pdf" with the following command:

```
QRLabeler.exe -b -d
Electronic_Scoresheet_Practice_Sandbox_Entries_Paid_02-12-2022.csv -f
BottleLabels.pdf
```

\*\* The "Electronic\_Scoresheet..." file is from the "Data Exports" section of the website, "Paid & Received Entries"

\* To convert PDFs of many score sheets with QR code labels into individual PDFs per entry:

```
QRLabeler.exe -r [source directory] -i [output directory]
```

For example, "TableSheets" is the name of the directory where the table pdfs can be found and "output" is the name of

the directory where PDFs of the score sheets per entry should be placed:

```
QRLabeler.exe -r TableSheets -o output
```

---

- Here are command line examples of creating both types of labels. If the CSV files are not in the same directory, be sure to include their path.

```
PS C:\repos\Beer\App\QRLabeler\bin\Debug> .\QRLabeler.exe -j -d Electronic_Scoresheet_Practice_Sandbox_Entries_Paid_02-12-2022.csv -f JudgingLabels_021222.pdf -n 2
PS C:\repos\Beer\App\QRLabeler\bin\Debug> .\QRLabeler.exe -b -d Electronic_Scoresheet_Practice_Sandbox_Entries_Paid_02-12-2022.csv -f BottleLabels_021222.pdf -n 2
PS C:\repos\Beer\App\QRLabeler\bin\Debug>
```

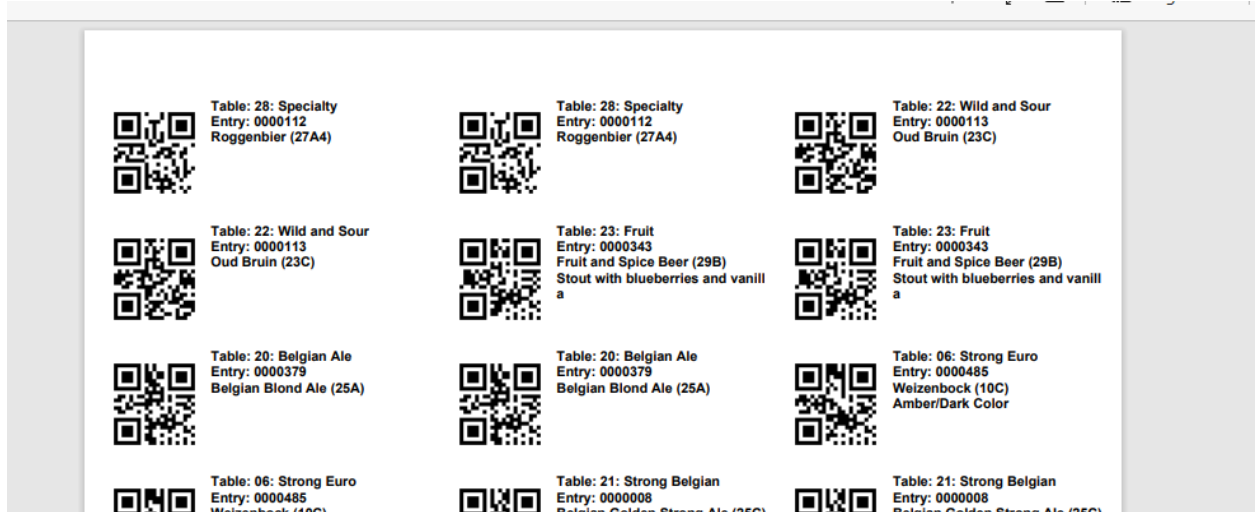

- With the previous commands, the two files below were created:

 BottleLabels_021222.pdf	2/12/2022 8:41 AM	Microsoft Edge PDF ...	54 KB
 JudgingLabels_021222.pdf	2/12/2022 8:40 AM	Microsoft Edge PDF ...	279 KB

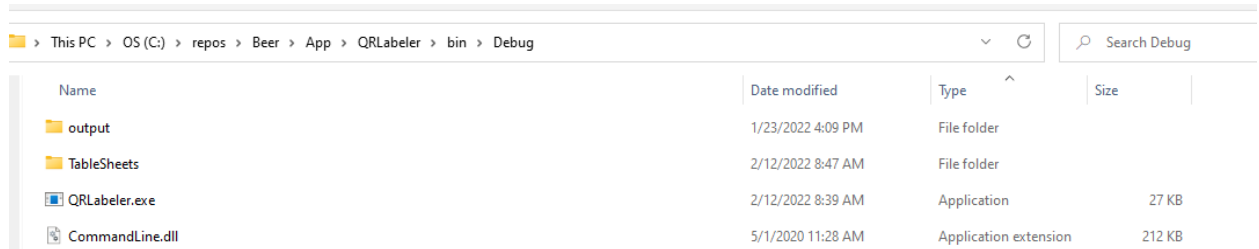

- Here is what the bottle labels look like, the entry number is vertical and the judging number in black.

- Here are the judging labels, all numbers including the QR code are judging numbers.

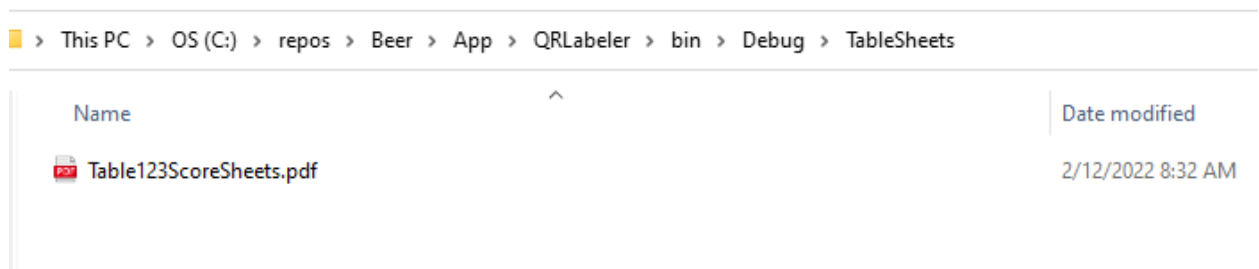

7. When processing table PDFs after judging, the program needs to know which directory holds all of the scanned PDFs and which directory the broken out PDFs should be placed. The image below shows the relative directory structure for the following example.

Name	Date modified	Type	Size
output	1/23/2022 4:09 PM	File folder	
TableSheets	2/12/2022 8:47 AM	File folder	
QRLabeler.exe	2/12/2022 8:39 AM	Application	27 KB
CommandLine.dll	5/1/2020 11:28 AM	Application extension	212 KB

8. In this example, the TableSheets directory has one file, which contains scanned images of 6 score sheets for 3 beers.

Name	Date modified
Table123ScoreSheets.pdf	2/12/2022 8:32 AM

9. The picture below shows an example of the scanned table PDF being processed into entry PDFs.

```
Directory of C:\repos\Beer\App\QRLabeler\bin\Debug\TableSheets
02/12/2022 09:02 AM <DIR> .
02/12/2022 08:49 AM <DIR> ..
